- Currently receiving practical training in Node.js backend development, with a focus on creating scalable and efficient server-side applications.

📂 PROJECTS

Chat-bot 🔗
- Developed an interactive chatbot application using HTML, CSS, and JavaScript, enabling real-time user interaction with predefined responses. Implemented user input handling, message display, and basic chatbot logic with a smooth, responsive design.

Blog Website 🔗
- A blog website built using Node.js, Express.js, EJS, and MongoDB. It allows users to create, edit, and delete blog posts with a simple and clean UI.

Explore GitHub Repositories 🔗
- Created a GitHub Repositories Explorer using HTML, CSS, and JavaScript to fetch and display repositories via GitHub's API. Implemented search functionality and dynamic rendering of repository data for an enhanced user experience.

Weather Application 🔗
- A web application that fetches and displays weather information based on user input (city name). web applications using the latest technologies, including HTML, CSS, JavaScript, Node.js, Express, Mongoose, and MongoDB.

Voting Application 🔗
- Created an Voting Application project with NodeJS, ExpressJS & MongoDB, integrating various modules and routes to create a robust and interactive voting platform. I have also used postman software.

🎖 CERTIFICATES

- Front-End Web Development bootcamp 🔗
- Back-End Web Development Bootcamp 🔗
- MongoDB Node.js Development Path 🔗
- Node(Basic) Certificate 🔗

🧩 HACKATHONS

Intelliy Hackathon, Marwadi University
April 2023 | Rajkot, India
- I Participated in national level hackathon in Marwadi University. I was the finalists in this hackathon.

🧩 VOLUNTEERING

Web Horizon, Marwadi University
September 2024
- Volunteered at Web Horizon on 27-28 Sep 2024, a front-end web development event, assisting in coordination to create an engaging environment for showcasing innovation.
